# Rookery South Energy from Waste

## Community Update

Dear Residents, we are looking forward to developing a good relationship with all our neighbours and, as previously communicated, we will update you on activities as the construction phase progresses.

Following an application to the planning authority, permission has been granted by Central Bedfordshire Council to undertake construction work over 24 hours per day between 15<sup>th</sup> May 2019 and 22<sup>nd</sup> August 2019 . In view of this, we are proposing to begin 24 hour work on site from 10<sup>th</sup> June 2019. This is to allow us to complete the main concrete structure by continuous concrete pour. There will be no piling works overnight.

There should be no noticeable increase in noise or disruption from site but if you have any questions or concerns, please contact the site directly on **07950 387 124**, this number will be available at all times. This working practice will significantly reduce risk and shorten the overall duration of project works.

Thank you in advance for your patience during these works. If you need to contact me I am available on the contact details below.
